EXP. No. 03

3> Create a bot in which to name a student and display enrollment number and marks ~~score~~ scored in the three subjects.  
(Working With Variables).

Step 1:- Open UI Path Studio then go to the process option and pop out will come and name the process.

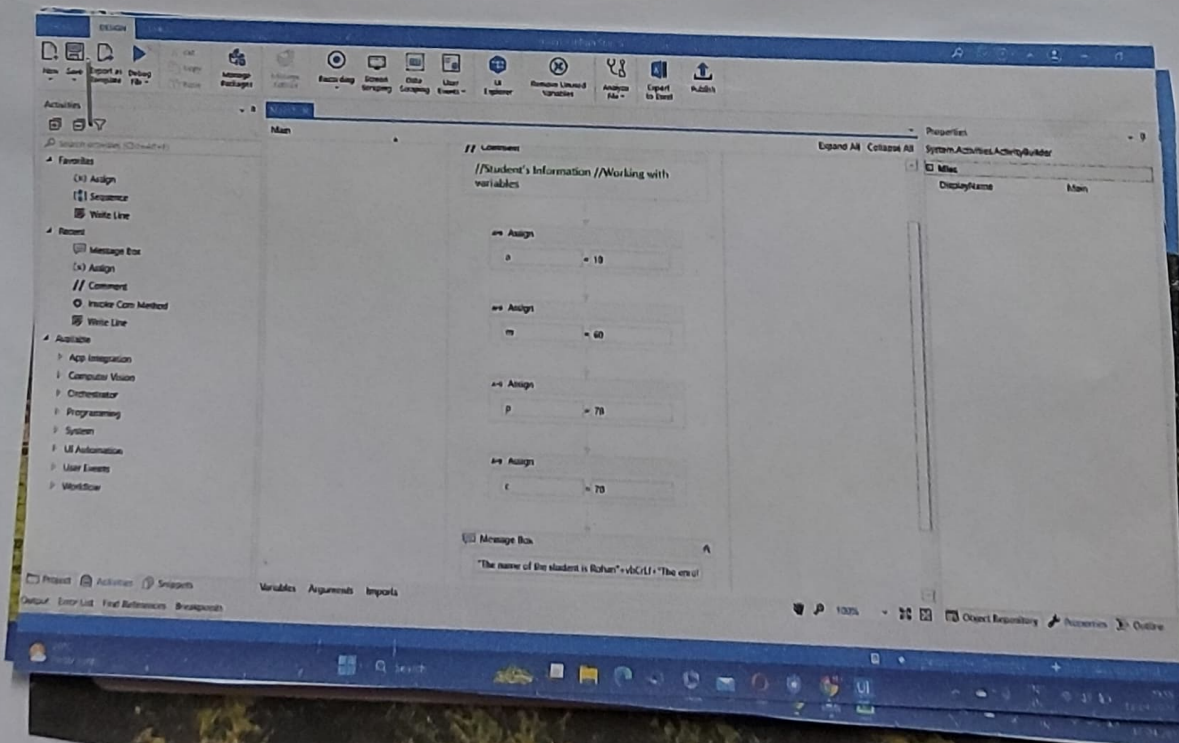

Step 2:- Assign the value to a variable 'a' using an assignment operator. Here, 'a' will represent the enrollment number.

Step 3:- Similarly assign a variable 'm' which represent the marks scored in maths.

Step 4:- Also assign value to 'p' and 'c' variable, which represents the marks scored in physics and C programming.

Step 5:- With the help of Message Box display the req result by writing it in the message box.

NOTE → Change the datatype of variables i.e a, p, m, c to int.

← Sequence  
and Output  
of asked  
problem.
